예] 다음 프로그램의 문제점을 설명하라.

```
void TestGlobal(void){
     global = 10;

int global = 0;
int main(void){
     global = 10;
}
```

예] 다음 프로그램의 실행결과는?

```
#include <stdio.h>
             add(int, int);
                                                                   #include <stdio.h>
